842m²

N/A

Urban plot of 860 m2 in an area with new developments in Felanitx. This plot is located close to one of the access roads to Felanitx, in a formerly industrial area, around which there are new developments of housing and commercial premises. The plot is buildable in 80% of its surface, with a maximum height of 13 metres and a depth of up to 20 metres. It has electricity and water connection to the mains. The location of the plot is very good as it is on a corner and has an entrance from two streets. A very good investment possibility in a developing area.
