Delivery by November 2026 This contemporary residential project offers 20 exclusive units with different sizes, layouts, and bedroom configurations across multiple floors, giving buyers the opportunity to select the perfect home to suit their needs. Designed with sustainability in mind, the project features aerothermal systems and solar panels, ensuring energy efficiency and comfort. The expected delivery is November 2026. The development consists of 16 apartments with two bedrooms, four attics/penthouses with one bedroom, as well as two commercial units. Prices vary depending on the size, number of bedrooms, and floor level chosen. For example, Apartment 1B is a first-floor, two-bedroom, two-bathroom apartment with a living room and open-plan kitchen, - (Ask for More Details)
