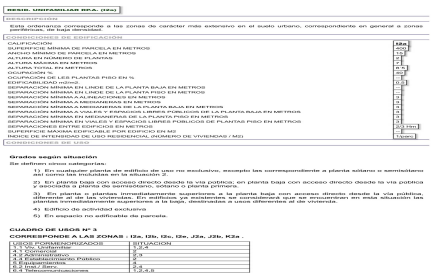
Land a Plots in Bonanova a Son Armadans



0	0	N/A	751m²	N/A

Approx. 750sqm plot in Bonanova with 40% buildability, suited to a single-family home in one of Palma's most established residential areas. Set at the upper end of Carrer Saridakis, the plot is elevated and sloping, which lends itself well to a split-level design. The dual street access is a real advantage here, allowing for better positioning of parking and more flexibility in the overall layout. The combination of slope and dual access makes the plot straightforward to design and build efficiently. Bonanova remains a go-to area for buyers wanting proximity to Palma, international schools, and the port, without being in the centre. A solid option for building a long-term home...(Ask for More Details!)
