Sea Views, Sophisticated Design, and Unmatched Comfort The Intempo Building is a striking residential skyscraper with 52 floors, including five mechanical floors and three basement parking levels. Its design stands out due to its unique geometric configuration: two parallel towers that connect at the lower floors and then merge at the upper levels with an inverted cone structure on an elliptical base. This modern architectural style makes the building a landmark in the area. The structure is built using reinforced concrete, ensuring stability and durability. The use of high-resistance materials in construction, including reinforced slabs and walls, guarantees the building's longevity. Inside the apartments, there is a focus on maximizing...(Ask for More Details!)
