Completion February 2026 We are delighted to present this outstanding new development of modern homes, built to the highest standards of energy efficiency, comfort, and construction quality. Scheduled for completion in February 2026, these properties have been designed using advanced materials that ensure a healthy indoor environment, exceptional comfort, and long-lasting durability. Each home enjoys panoramic sea views and features impeccably finished interiors with perfectly smooth walls fully protected against humidity. The innovative construction system prevents mould formation and maintains a stable, comfortable indoor climate throughout the year. Every property includes a reinforced concrete basement with bunker-style construction and a ceiling height of 2.85 meters, offering versatile space suitable. (Ask for More Details)
