268m<sup>2</sup>

749m<sup>2</sup>

This fantastic villa impresses with its light and location. With over 200 m<sup>2</sup> of living space, this house offers enough room for three bedrooms, three bathrooms and an office. The house has an open-plan design and lets in natural light at any time of day thanks to the large window fronts. Particular attention should be paid to the high construction quality and the high-quality materials. The villa is also technically state-of-the-art and naturally has underfloor heating, air conditioning and its own photovoltaic system. Naturally, it has a private but low-maintenance garden with its own pool and a large roof terrace with fantastic sea views.
