New Villa La Quinta Benahavis. Just launched to the market, we are pleased to present this beautiful, modern architectural masterpiece, which has been designed by the renowned architect Tobal. This unique, modern estate will be the largest private villa, within this exclusive community here in The Hills. The community here is fast becoming one of the most secure, and private areas on the coastline. Located at the end of the urbanization, the villa offers both privacy and undisturbed views. On entering the home, You will immediately be greeted by large floor to ceiling windows, which frame, and showcase the stunning panoramic views out over the ocean. One of our favourite spaces in the home is the double height main living space, with its main feature wall, and surrounded by floor to ceiling glass giving you a wonderful connection to the outdoor spaces. Here outside you have a selection of covered and open terrace spaces in which to relax...
